

STATEMENT OF PURPOSE

Demo application for a Master's pathway in Germany

Applicant: Arjun Mehta

Target: Master's degree in Computer Science in Germany

Academic Background

I completed a bachelor of technology in computer science and engineering at Riverview Institute of Technology, Bengaluru in 2025 with a final CGPA of 8.42 / 10.00. My coursework included data structures, databases, operating systems, networking, and software engineering.

Motivation

I want to deepen my understanding of distributed systems, applied artificial intelligence, and scalable software. A Master's program in Germany is attractive to me because of its research-oriented environment and strong engineering focus.

Relevant Experience

During an eight-month software engineering internship, I worked with TypeScript, Node.js, PostgreSQL, and REST APIs. This experience strengthened my interest in backend systems and software architecture.

Study Goal

My goal is to join a Master's program in Computer Science, improve my technical depth, and later work on software products involving AI and data-driven systems.
